

Round to the Nearest Hundred

Directions: A stack of cards (digits 0-9) is placed face down on the table. Each player takes three cards from the top of the stack and places them on the board in the order drawn to make a 3-digit number. Each player rounds his/her 3-digit number to the nearest hundred and uses the sentence frame to explain his/her thinking. The player with the largest number when rounded takes all six cards. Play continues until all cards in the deck have been used. The player with the most cards wins the round.

Player One	Player Two

_____ is between _____ and _____ and is rounded  to _____.
